**100%**

Document Protection

## About the Company

# About Sadq.

Sadq is a Saudi digital platform that enables companies to sign documents electronically in a legally binding way within seconds.

The platform was designed to replace traditional paper-based transactions and strengthen digital ones with modern, secure solutions, eliminating the need for printing, scanning and manual signing – unifying work onto a single digital interface, linked to digital identity and built on Saudi infrastructure hosted locally and fully aligned with Saudi regulations.

### Faster Transaction Completion

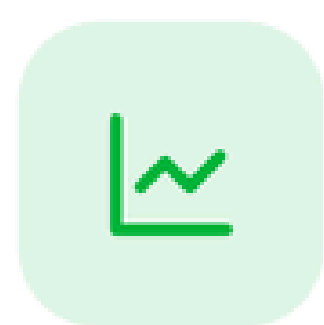

# 90%

Documents move from send to sign in minutes instead of days

### Document Protection

# 100%

documents are digitally sealed – cannot be edited or tampered with after signing

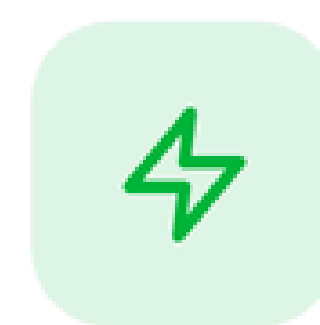

### Productivity

Teams complete their work faster and clients sign quickly and accurately, with a high layer of security

### Digital Trust

Certified digital certificates, timestamping, and a legal audit trail across every sector.

### Efficiency

An integrated digital workflow – from document creation to signing and archiving.

### In accordance with the Saudi Electronic Transactions Law

Electronic signatures are legally recognized and carry the same legal weight as handwritten signatures – provided they are linked to a digital certificate issued by **a certification service provider licensed by the Digital Government Authority – a requirement Sadq fully complies with.**

## Compliance

# Licenses & Compliance.

Sadq holds the required government licenses and accreditations to provide legally binding digital signature services in Saudi Arabia.

### National Cybersecurity Authority

Registered Cybersecurity Service Provider

## Highest Levels of Security

Advanced data encryption at rest and in transit

Locally hosted inside the Kingdom of Saudi Arabia

Two-factor authentication and detailed audit trail

Trusted timestamping and long-term validation certificates

## The Platform

# What Makes Sadq Different?

Built from the ground up for the Saudi market with a clear interface, multiple verification methods, and a continuously evolving product

01

**Seamless User Experience**

A simple experience for users inside and outside the company, with minimal steps, no registration required for signers, and a clean Arabic/English interface.

02

**Multiple Authentication Methods**

Via Absher, Wathiq, Nafath, email, and SMS (OTP)

03

**Product Flexibility & Continuous Development**

The platform grows with your business needs and expectations. New features every 3–4 weeks, built directly on customer feedback

04

**Saudi Platform**

Built, hosted, and supported inside Saudi Arabia, and compliant with the Electronic Transactions Law and local data protection requirements.

05

**Ready APIs & Integrations**

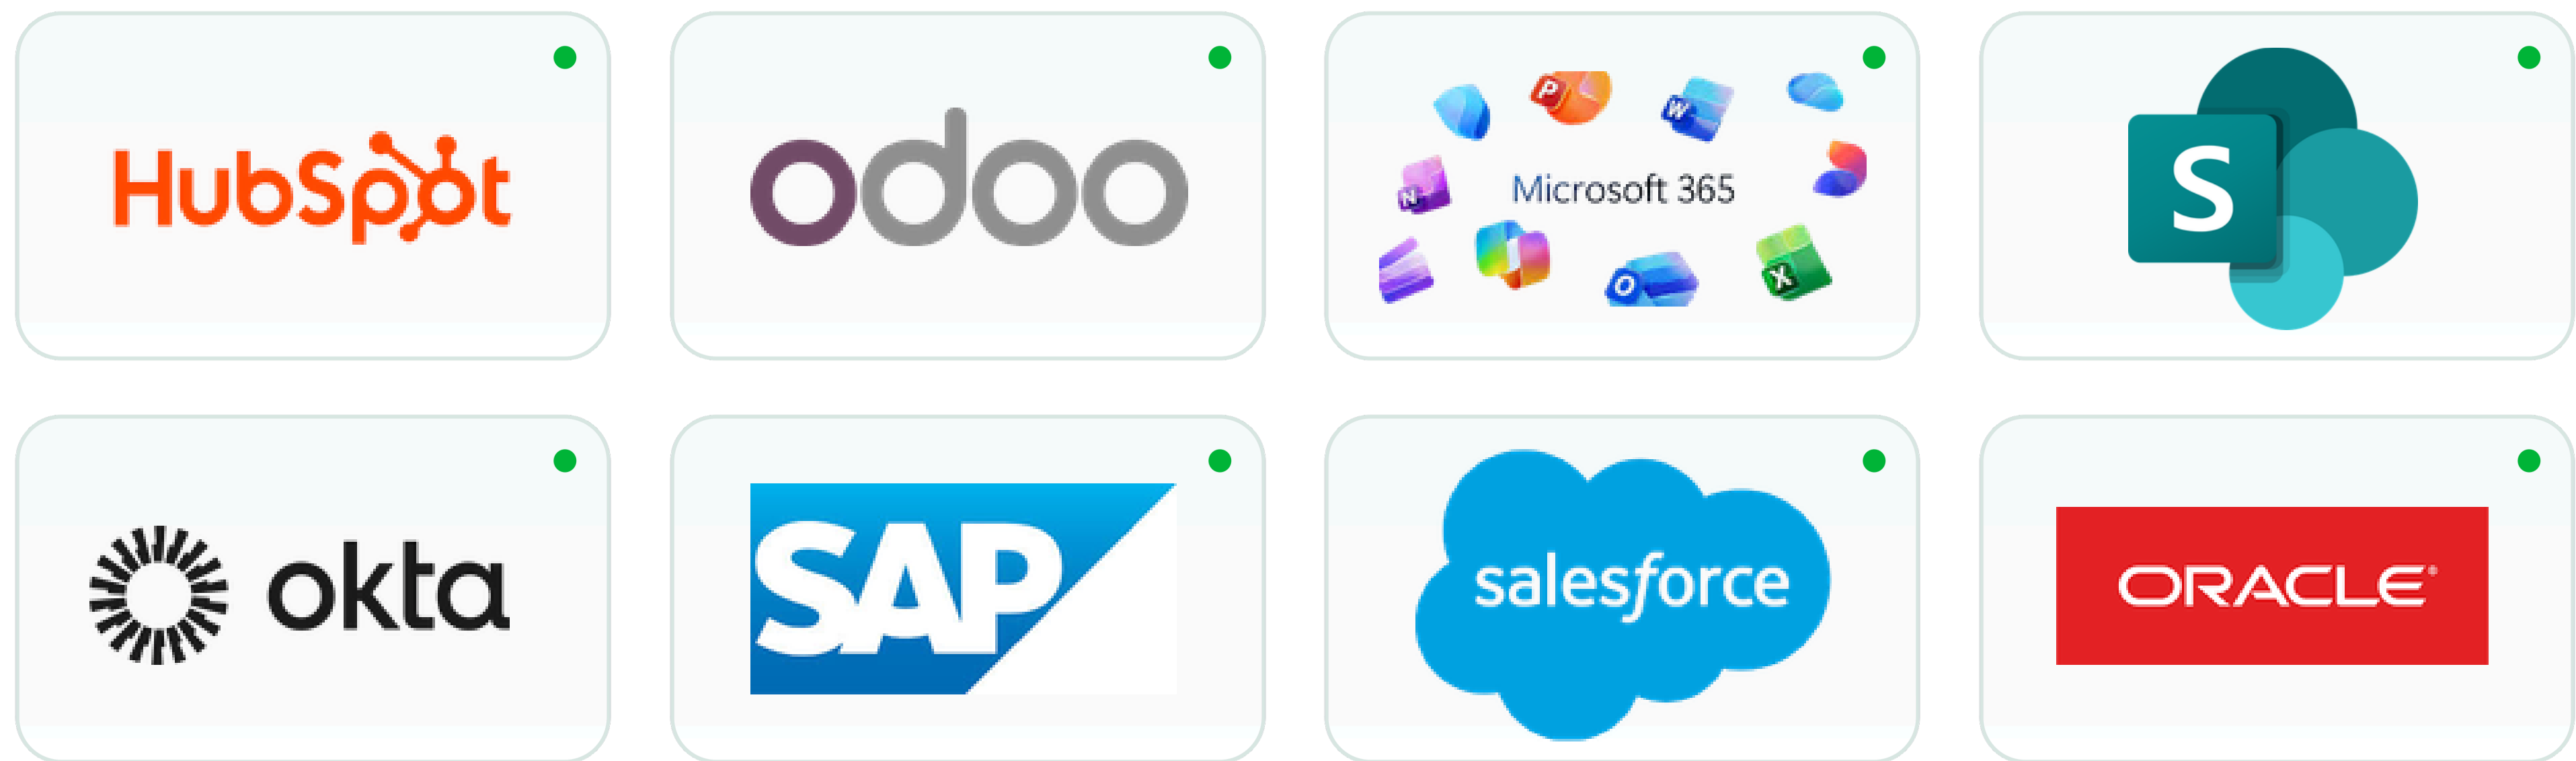

Flexible APIs and direct integrations with SharePoint, Microsoft 365, HubSpot, Salesforce, Oracle, Okta, SAP, and Odoo — for uninterrupted workflows.

# Two Ways to Use Sadq.

Pick the path that fits your team — a ready-to-use platform for your users, or an API stack to embed Sadq inside your own systems.

## PATH 1 · PLANS

### Ready-to-use platform

Get your team started quickly with Sadq's ready-made workspace for users, permissions, signing workflows, and audit trails.

No technical setup required.

#### BEST FOR

Teams and enterprises that need digital signing without building a custom integration.

#### PRICED BY

**Number of users**

## PATH 2 · API

### Embed Sadq into your systems

Integrate Sadq directly into your product or internal systems through flexible API methods and ready-made workflow bundles such as KYB, vendor onboarding, and NDA flows.

Your users can complete signing journeys without leaving your interface.

#### BEST FOR

Platforms and products that need digital signing embedded inside their own user experience.

#### PRICED BY

**Annual signature volume + integration scope**

## Plans

# Sadq Packages.

Three plans designed to grow with your business

## From Small teams to large enterprises

### Basic Plan

#### For a Smart Start

Everything you need to begin digital signing: multiple authentication methods, audit trail, and cloud integrations.

### Professional Plan

#### For growing teams

Includes everything in Basic, plus team management, templates, custom branding, and workflow reviews.

### Advance Plan

#### Sadq Advance services

Signing on behalf of the entity, enterprise integrations, and advanced reports  
Complete Enterprise Solution.

Essential - Plan 1

# Essential Plan.

Your starting point for legally binding digital signatures — with everything teams need to start working today

## Essentials

- ✓ 75 signature requests per user/month  
User and admin dashboard
- ✓ Arabic and English language support
- ✓ realtime audit tracking
- ✓ Login using username/mobile number + password
- ✓ SSO login through AD, Okta, O365, and Azure
- ✓ Signing order: sequential and parallel
- ✓ Educational guide for signers and recipients
- ✓ Set invitation expiry date
- ✓ Reminder/notification for document signing
- ✓ Import recipients from Excel
- ✓ Pre-built email templates
- ✓ Integration with Google Drive, Dropbox, and OneDrive

## Authentication & Invitation Methods

- ✓ Email invitation (Arabic/English) ·
- ✓ SMS invitation · Email & SMS
- ✓ authentication · WhatsApp
- ✓ authentication \*\* · Nafath
- ✓ authentication + auto-registration
- ✓ Nafath app authentication \*\*

- ✓ Absher code \*\*
- ✓ Sign in (username/mobile + password)
- ✓ Sign in via SSO (AD, Okta, O365, Azure)

## Workflow & Integrations

- ✓ Trusted timestamping TSA
- ✓ Long-Term Validation LTV
- ✓ Legally binding signatures
- ✓ Online signature verification
- ✓ Audit and activity logs
- ✓ Two-factor authentication 2FA
- ✓ Mobile app: Android and iOS
- ✓ Download signed documents and save them
- ✓ No registration required to sign
- ✓ Saved signatures and stamps
- ✓ Apply signature to all fields at once
- ✓ Automatic background removal for signatures and stamps
- ✓ Share documents across users and WhatsApp
- ✓ Download documents with or without legal proof
- ✓ Rename documents
- ✓ Prevent access through Proxy/VPN

Services marked with two asterisks are subject to additional usage-based fees \*\*

## Professional - Plan 2

# Professional Plan.

Includes everything in the Basic Plan, plus workflow tools, template management, access controls, and additional features.

## Governance & Access

- ✓ Role-based permissions
- ✓ Access only through the company network Wi-Fi
- ✓ Send invitations from the company email
- ✓ Default company redirect address
- ✓ Custom branding
- ✓ Transfer document ownership for deleted users
- ✓ Assign manager as default reviewer
- ✓ Manage access to employee documents

## Advanced Workflow

- ✓ Save documents and action plans as draft workflows
- ✓ Workflow with reviewers before signing
- ✓ Signature map permission
- ✓ Extend expiry date
- ✓ Send to a predefined recipient group
- ✓ Bulk contact upload and search
- ✓ Bulk cancel or delete documents

- ✓ Electronic seal for sender & recipient · Bulk signature sending
- ✓ Reassign signature request to another signer
- ✓ Automatic delegated signing
- ✓ Share created workflows with other users

## Templates & Notifications

- ✓ Save pre-built document templates
- ✓ Link workflows (signers & reviewers) to templates
- ✓ Share document templates with users
- ✓ QR Document verification via QR
- ✓ Custom text invitation per recipient (Arabic/English)
- ✓ WhatsApp notification (Arabic/English) \*\*

## Signer Experience

- ✓ Upload documents by the website\*\*
- ✓ Resize signature by the website
- ✓ Add date with signature, fingerprint, or stamp
- ✓ Share support links inside the platform

Services marked with two asterisks are subject to additional usage-based fees \*\*

Advance Plan - Plan 3

# Advanced Plan.

Includes everything in the Professional Plan — plus additional features

## Enterprise Infrastructure

- ✓ Unified access for multiple branches
- ✓ Document archiving on Sadq portal · Create departments & sub-departments
- ✓ Send requests to internal departments
- ✓ Escalation policy management · Set quotas & signatures per user
- ✓ Advanced reports & analytics
- ✓ Local hosting or private cloud

# API Integration Paths.

Choose the integration depth that fits your product, then add ready-made workflow bundles on top.

### Invitation Model

Sadq runs the full signing journey. Your system creates the request, and Sadq handles invitation, identity verification, signing, and completion. Best for external or one-time signers.

01

### SDK Integration

Embed Sadq signing components inside your own app. You control the user experience, while Sadq powers the signing engine, verification, and audit trail in the background.

02

### Nafath Hash Model

Verify identity through Nafath without exposing Sadq to the end user. Your platform owns the full journey from start to finish, while Sadq secures the signed output.

03

## Pre-built API combinations.

### WORKFLOW BUNDLES

#### Workflow Bundles

Combine API calls and workflow logic to launch common signing journeys faster.

● KYB · Know Your Business

● Vendor Onboarding

● NDA Flow

● Customer Onboarding (KYC + sign)

● Multi-party Contract Routing

● Document Sealing API
